FOREWORD

The S.B.A.I.R. (Stud Book Authority of IR Iran) is pleased to present the Asil Horse Stud Book, Volume VIII, divided in the following sections.

Section 1:

- Details of horses born between 2017 to 2018 and all late registrations, not included in previous volumes. Late registrations were caused by lack of documentation (export certificate from country of origin & late parentage verification.)

The alphabetical order they are appearing in Section 1 is based on the Persian alphabet and the year they are born. It has been a rule in Iran for breeders, to use the same letter of Alphabet for naming their offspring, starting the 1st of January to the 15th of December. All horses born within the same year have their names beginning with the same letter.

- All offspring imported in utero have the (i.i.u) code in brackets following their names.

Section 2:

- List of Stallions standing in Iran & abroad and their progeny.

- Stallions domiciled abroad and whose progeny were born in Iran have no volume number following their name as they have not been registered in our country.

- Stallions are appearing in Latin alphabetical order.

Section 3:

- List of Broodmares appearing in this volume and their produce. In this section as well, Broodmares are classified in Latin alphabetical order.

Section 4:

- List of Imported Horses Male & Female whose progeny are appearing in this volume and the ones imported until 2019.

Section 5:

- List of Breeders & the horses they have bred & entered in this volume.

Section 6:

- Obituary of horses that died since 2017.

An Index of all horses can be found at the end of this volume.

SHABDIZ, Persian Miniature

Fictional character in *the Shahnameh* or *the Book of Kings*, written by the Persian poet *Ferdowsi* between c. 977 & 1010.

The beloved black stallion belonging to the Sassanid Persian King *Khosrau Parwiz*. **Shabdiz**, meaning *Midnight* was said to be beautiful, intelligent and the “world’s” fastest horse, so quick not even a storm could keep up pace with it: His stablemate *Gulgun* was the second fastest.
